

...Around the Clock Beverage Solutions

Euro Drink

The **Euro Drink** provides customers with an excellent choice of hot beverage selections. Up to seven different instant drinks can be specified, including two coffee choices as standard. All tea and coffee selections offer a strength option to satisfy individual preferences

The machine is also available as a freshbrew model, offering customers a choice of either freshly brewed tea or coffee. The paperless brewer not only increases the versatility of the machine, but also makes cleaning and maintaining the unit quicker and easier.

Key Euro Drink features:

- Choice of instant only or freshbrew tea or coffee selections for superior beverage choice
- Simple, user friendly operation with an electronic message display
- Strength option available for tea and coffee selections
- Large, 850 cup capacity accommodates the busiest locations and reduces "out of cups" messages
- Paperless brewer provides simple operation plus easy cleaning and maintenance
- Quick and simple to clean and replenish
- Programmable auto flush system increases hygiene standard and preserves drink quality
- Microprocessor control for reliability and flexibility
- Full audit facility at the touch of a button
- Compatible with leading MDB and Executive coin and cashless systems
- Automatic cup station door for increased customer safety
- Designed to integrate seamlessly with complete range of National Vendors merchandisers

Euro Drink - Models 634 & 636

Market leaders in snack, food and drinks vending for over 75 years, National Vendors are renowned for class leading reliability, high quality, and innovative vending solutions.

National Vendors are part of the operating group Crane Merchandising Systems, which provides innovative technological and business solutions to vend operators and suppliers throughout the world.

Euro Twin

National Vendors **Euro Twin** models offer all of the features of Euro Drink machines with the addition of two chilled cold drink selections, either carbonated or still, plus cold water.

Hygiene standards within the machine are raised with the fitting as standard of the **Dry-Cool™** cold plate. Water entering the cold system is chilled before dispense, improving sanitation and reducing cold system maintenance. The machines also feature a unique syrup monitor which assures customers of cold drink quality.

Key Euro Twin features:

- Superb choice of Instant or freshbrew hot drinks plus a choice of two chilled syrup selections, still or carbonated and cold water
- **Dry-Cool™** cold plate improves cold system sanitation and reduces maintenance
- Strength option available for tea and coffee selections
- Large, 850 cup capacity accommodates the busiest locations and reduces "out of cups" messages

Euro Twin - Models 631 & 639

Branding Opportunities

Offering branded products provides strong point-of-sale impact as well as customer recognition and reassurance that keeps them coming back for more. National Vendors machines provide the perfect platform to attract these increased sales which in turn lead to increased profits!

Large graphic areas on all machines as well as the drink selection decals, provide ample branding opportunities, increasing customer confidence and promoting sales.

Drinks Choice

Both machines feature a large cup capacity making them ideal for high volume locations.

The easily re-stockable cup holder is mounted on the rear of the door and can hold up to 850, 180 ml. (7 fl. oz.) cups, reducing "out of cups" messages and increased customer satisfaction.

Audit Information

Both models are equipped with an innovative audit system which records sales information, aiding stock control and machine management.

This information can be recalled by the operator via the machine's display panel and a printed copy produced using an optional hand-held printer.

Payment Systems

Euro Drink and Euro Twin machines are compatible with the leading M.D.B. and Executive coin and cashless systems.

Either option can be fitted depending on the payment format required.

Safety Door

All drinks are dispensed behind a safety door which remains closed during a vend, preventing customers from accidentally scalding themselves.

Once the cup has been filled, the door opens automatically allowing the cup to be retrieved safely.

Integrated Merchandising Solutions

Euro Drink and Euro Twin machines are styled to co-ordinate seamlessly with the complete range of food, snack and drinks machines from the National Vendors range, creating a totally integrated merchandising solution.
